

I get this error when trying to start a group chat:

File

"C:\Users\wyatt\OneDrive\Desktop\ai\_chatrooms\_testing\ai\_chatrooms\conversation\views.py", line 258, in get\_all\_conversations

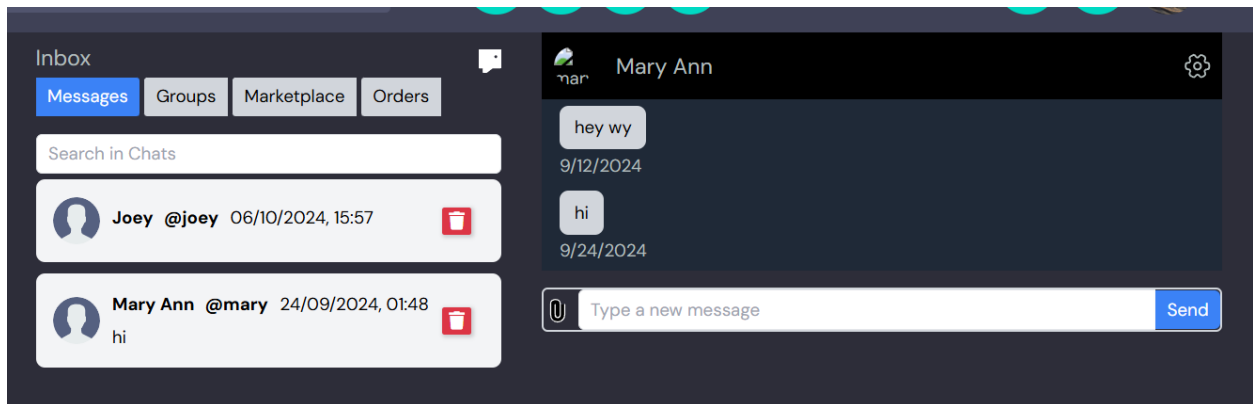

```
'last_message_id': message.id,
```

```
^^^^^^
```

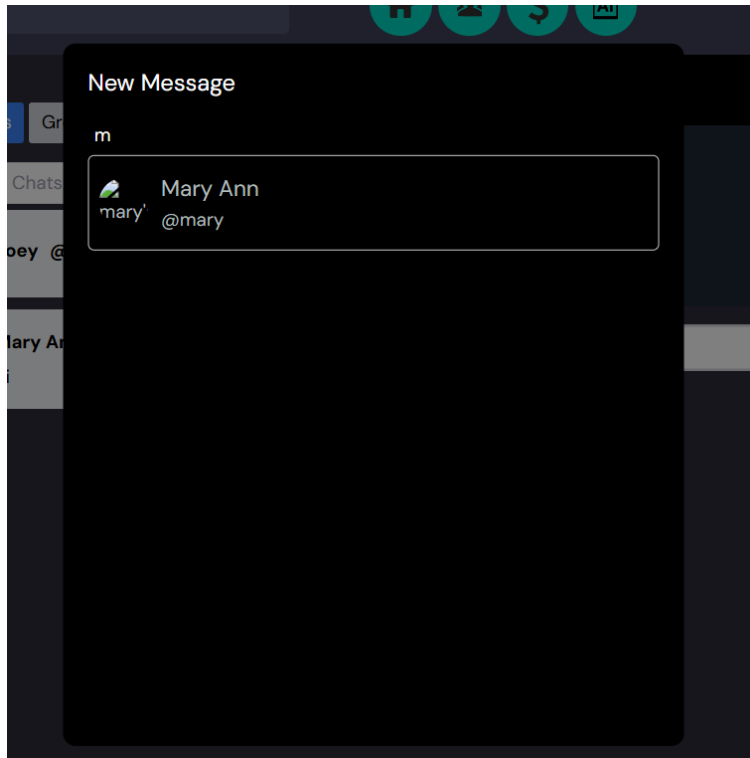

UnboundLocalError: cannot access local variable 'message' where it is not associated with a value

HTTP GET /inbox/get-all-conversations/?type=group 500 [0.09, 127.0.0.1:62594]

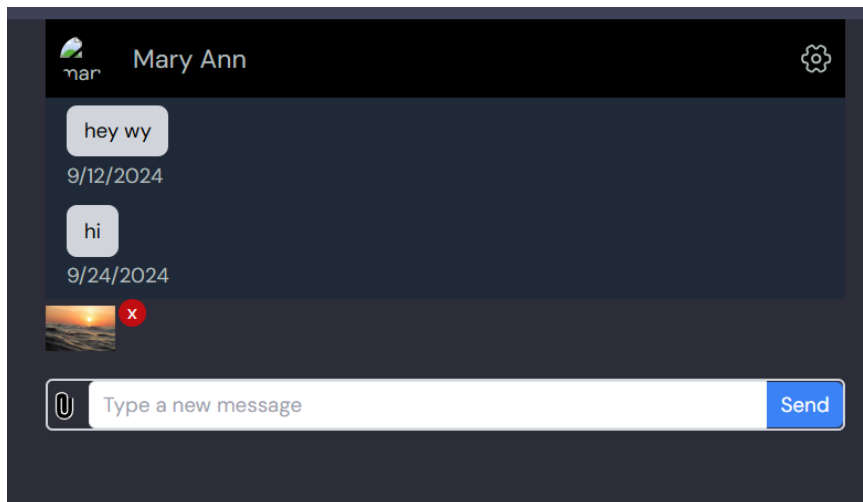

The default profile pic you see on the left does not show up in the top of the chat on the right:

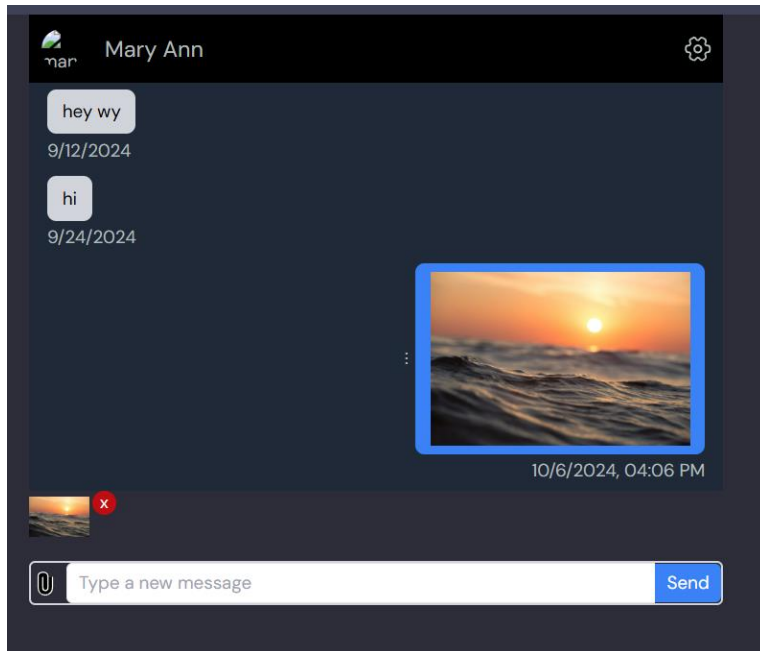

It does not show up here either:

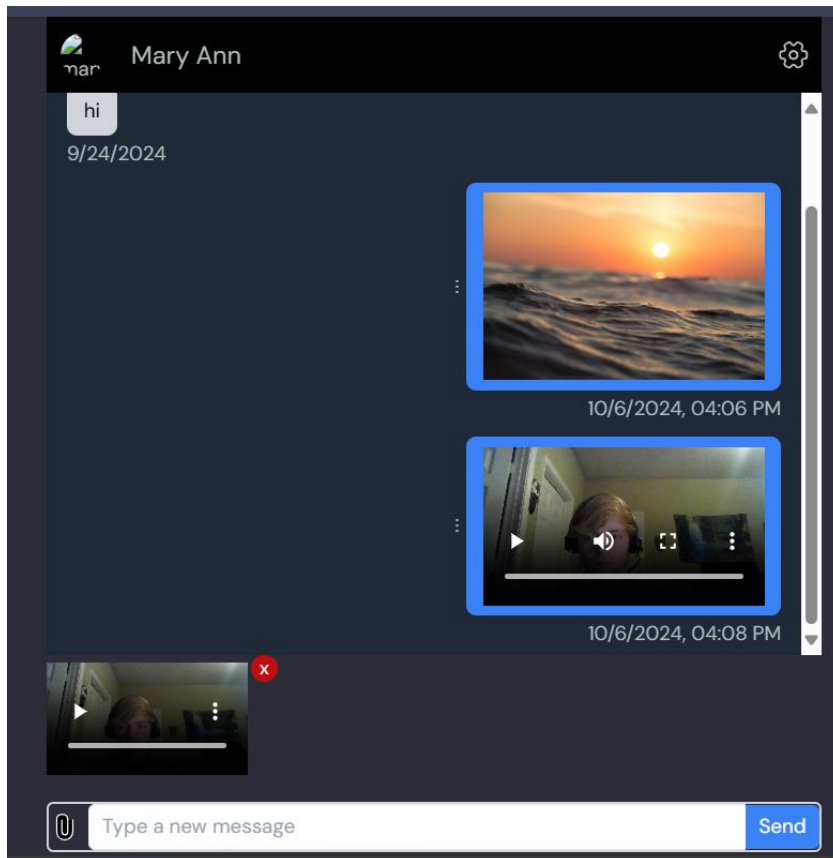

The message preview is too small:

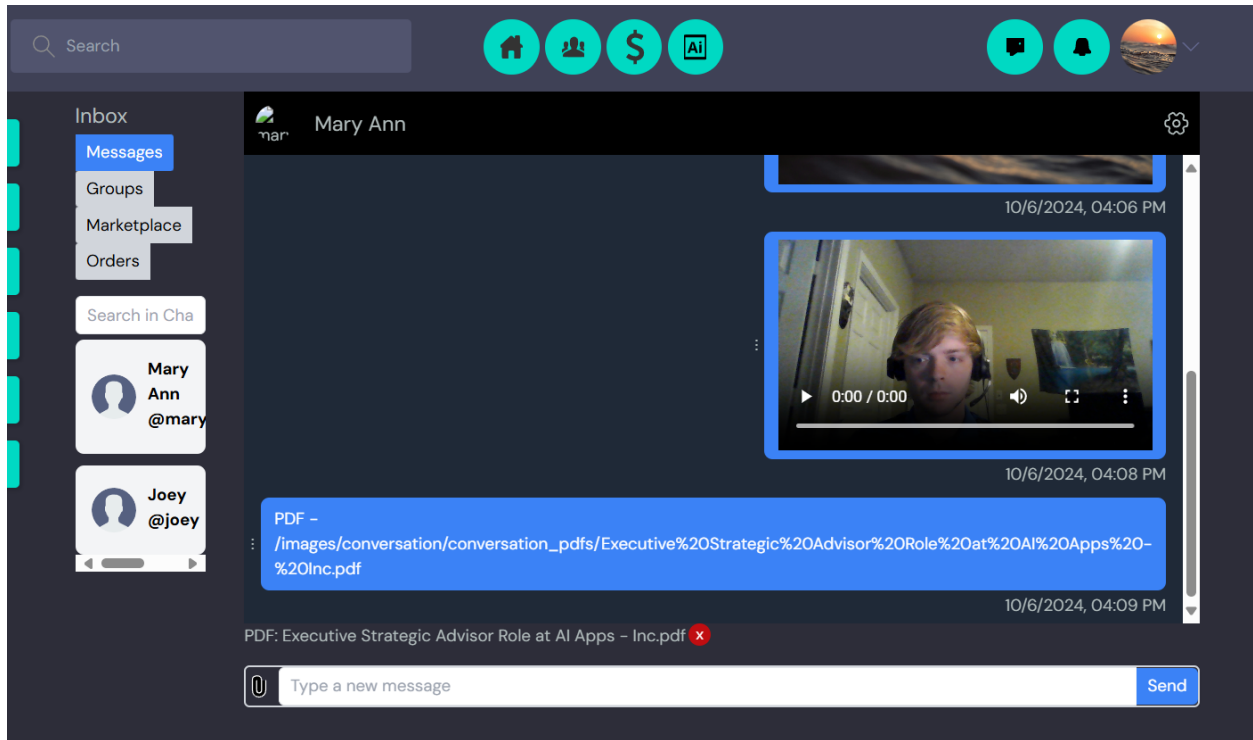

The message preview also should disappear once the photo is sent:

Same thing happens with videos:

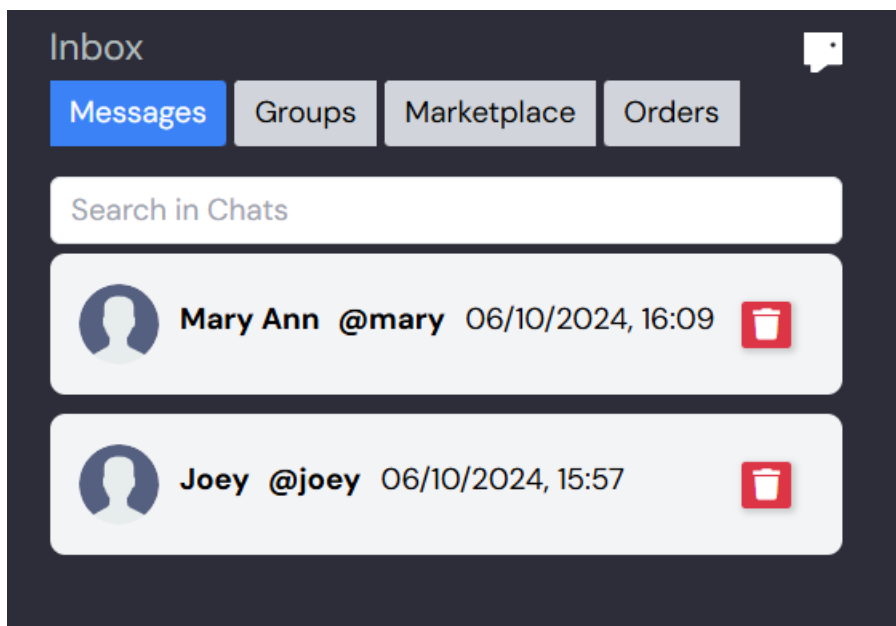

The PDF appearance in the chat does not work at all and warps the rest of the screen:

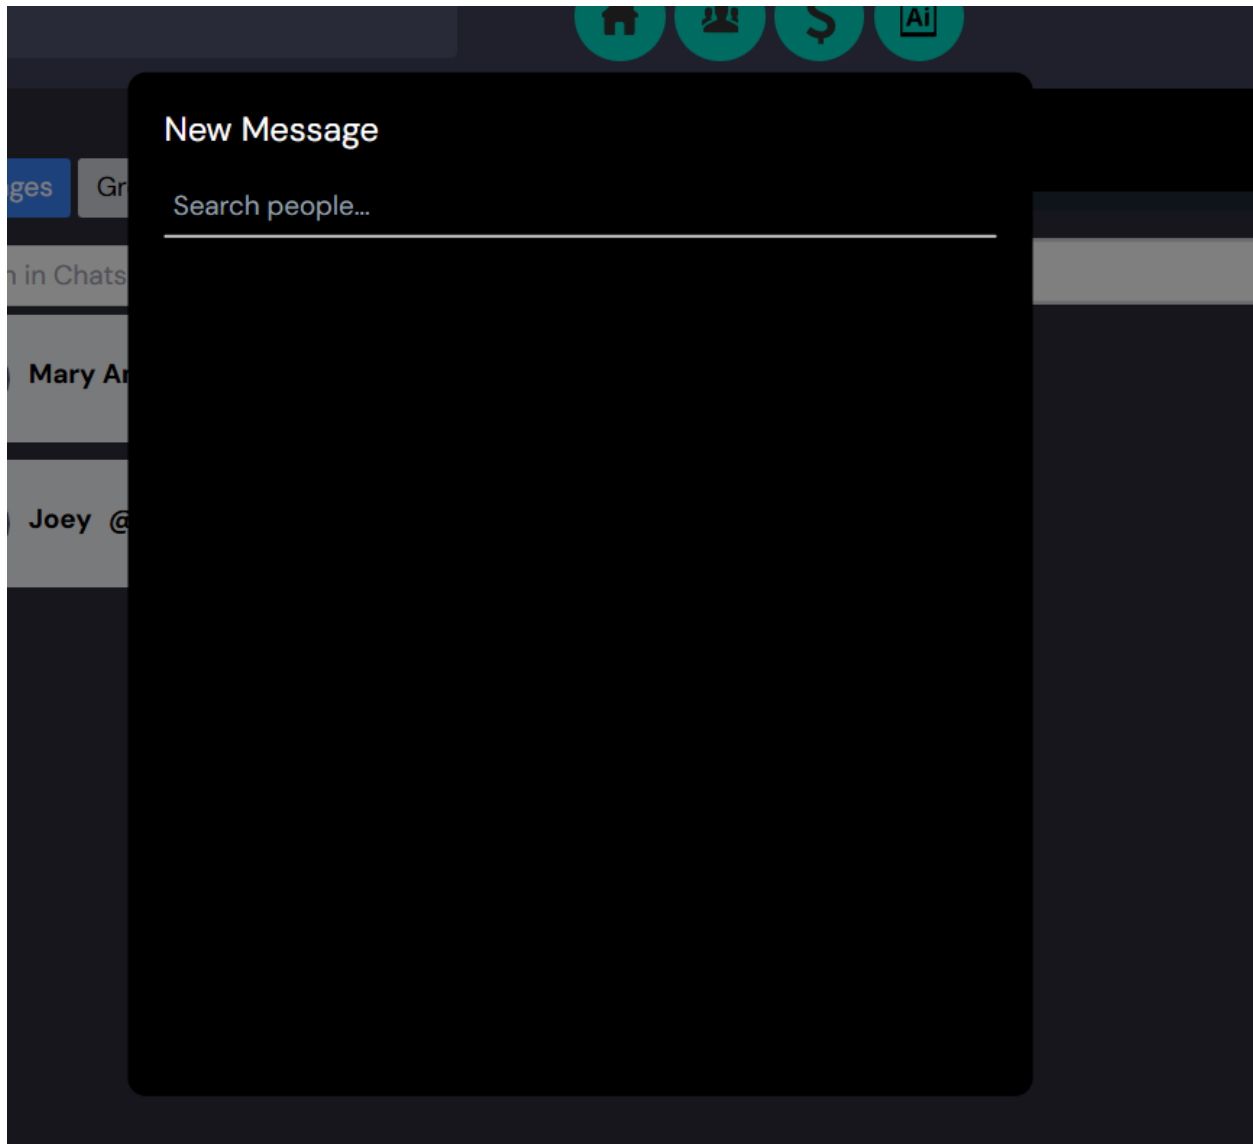

Same thing happens with other file types

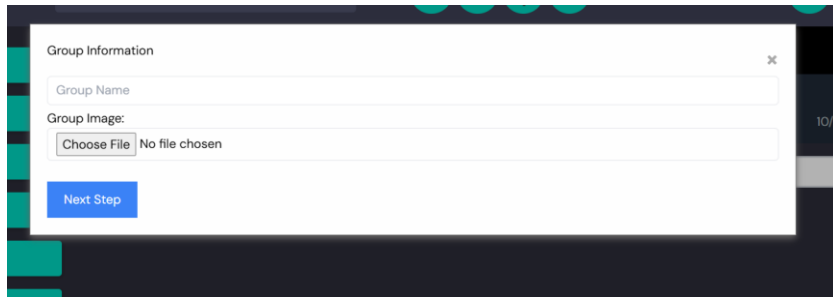

Group chats should be in the same tab as the normal messages:

This means that you should be able to select multiple users in the Messages new message screen:

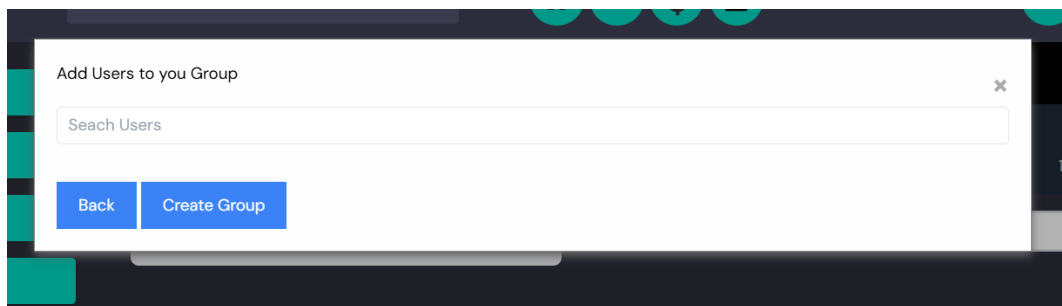

That means get rid of this screen:

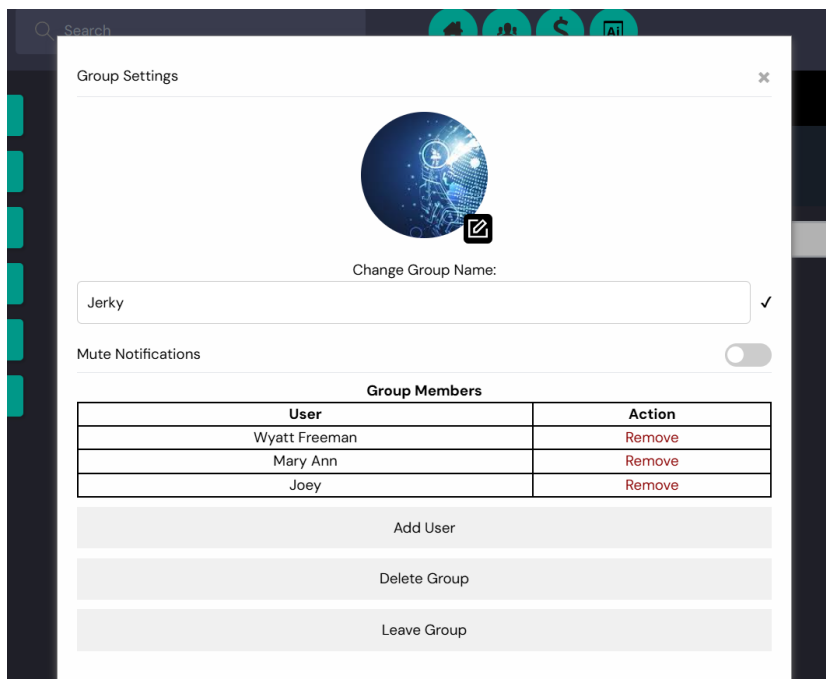

A screenshot of a mobile application screen titled "Group Information". It features a "Group Name" text input field, a "Group Image:" label, and a "Choose File" button next to the text "No file chosen". At the bottom is a blue "Next Step" button. The screen is part of a presentation, with a "10/6" indicator on the right.

And this one:

A screenshot of a mobile application screen titled "Add Users to your Group". It has a "Search Users" text input field. At the bottom are two blue buttons: "Back" and "Create Group". The screen is part of a presentation, with a "10" indicator on the right.

But keep this one which should be available once the first message is sent to multiple people in the 'group'

A screenshot of a mobile application screen titled "Group Settings". It features a circular group profile picture with a blue and white abstract design. Below the picture is a "Change Group Name:" label and a text input field containing "Jerky". To the right of the input field is a checkmark icon. Below the name field is a "Mute Notifications" toggle switch. Underneath is a section titled "Group Members" containing a table with two columns: "User" and "Action". The table lists three members: Wyatt Freeman, Mary Ann, and Joey, each with a "Remove" action link. At the bottom are three buttons: "Add User", "Delete Group", and "Leave Group".

User	Action
Wyatt Freeman	<a href="#">Remove</a>
Mary Ann	<a href="#">Remove</a>
Joey	<a href="#">Remove</a>
